

Building ASP.NET Web Pages with WebMatrix

Description: Building ASP.NET Web Pages with WebMatrix is a hands-on guide for first time website creators and hardened developers alike. Offering step-by-step instruction on how to get your website up and running, with a foray into HTML and CSS Basics. Learn how to create a simple and dynamic webpage, all on your own.

Are you looking to create your own website using Microsoft's ASP.NET Web Pages through WebMatrix? Need a straightforward guide on how get going? Whether you're an experienced web developer or just brand new to website design, Need2Know: Building ASP.NET Web Pages with WebMatrix offers you an accessible, step-by-step introduction to ASP.NET Web Pages server-side programming. This highly-focused primer demonstrates how to use Microsoft's free WebMatrix programming environment to seamlessly place your logic and HTML in a single page, making ASP.NET web development simple, quick and rewarding.

- Details how to quickly set up and deploy beautiful, functional websites using WebMatrix, Microsoft's free web programming environment
- Presents a rapid-fire introduction to HTML and CSS Basics for readers new to web development
- Teaches the essential Razor syntax in the context of real ASP.NET Web Pages programming examples
- Build a personal blog site with a secure log-in and email system
- Details how to incorporate posts and comments in a database and manage that data effectively, using SQL CE
- Shows how to add search engine optimization through WebMatrix reports and meta descriptions to generate traffic
- Takes the reader through the final steps of publishing the site to the web
